Each GGT Token is a linked security, initiated by a third party and formatted as a crypto asset. A linked security is a security issued by that third party which provides synthetic exposure to a referenced security. It is not an obligation of the issuer of the referenced security and confers no rights against, and no benefits from, that issuer.

The GGT Tokens are not physical commodities, exchange-traded fund shares or units, and do not entitle holders to hold, receive or claim any underlying asset. Holders have no rights against the issuer, manager, trustee or custodian of the referenced security, and none of them sponsors, endorses or is affiliated with the GGT Tokens or any Applicable Entity. Holders are exposed to the credit, solvency and operational risk of the relevant Token Issuer, and the Tokens may trade at a material discount to the value of the referenced security. Holders may lose the entire value of their investment.
